part 1

what is this book?

In an **art class** you make and play in three ways:

games

play that grows your skills

big artworks

real projects you make in
class

small artworks

quick practice, one a
class

this book

All three grow your **five skills**.

This book is your **small-artwork practice**. Next: your skills, then what's inside, then how to use it.

the skills

the skills & their outcomes

Five skills. Each grows through four **learning outcomes** (the steps below).

line & texture

identifies marks different tools make → makes different line types with intention →
combines line types to create texture → **draws using observed line and texture**

◆ **shape & form**

traces and draws basic 2d shapes → combines shapes to draw recognisable objects
→ modifies and combines shapes creatively → **identifies and draws simple 3d forms**

colour & painting

paints with control and early mixing → mixes primary to secondary reliably →
identifies warm and cool families → **creates tints and shades**

balance & composition

fills whole page → understands foreground/background →
draws overlapping for depth and horizon line →
understands colour/shape placement for balance

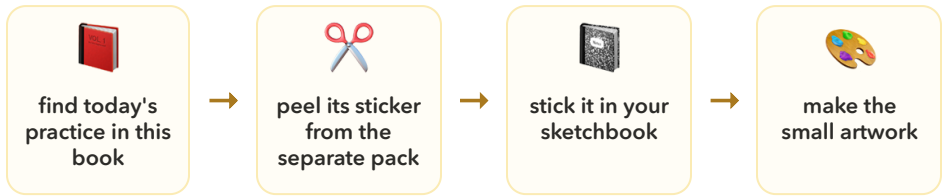

✨ **imagination & collaboration**

experiments freely → generates unusual ideas →
listens/contributes/decides together → **describes imagined world with enough detail**

On **every big artwork** you practise all five skills (a rotation), then make its **masterpiece**. Each skill comes back on every artwork – a little further each time (spiral).
